

## Certificate of Analysis

Page 1 of 2

<b>Client:</b> Mossop's Honey <b>Contact:</b> W Mossop C/- Mossop's Honey 1064 State Highway 29 RD 1 Tauranga 3171	<b>Lab No:</b> 2719806 <b>Date Received:</b> 30-Sep-2021 <b>Date Reported:</b> 06-Oct-2021 <b>Quote No:</b> 63921 <b>Order No:</b> 210914 Sample 1 <b>Client Reference:</b> 210914 <b>Submitted By:</b> Jordan Child	POPv1
---	--	-------

### Sample Type: Honey

<b>Sample Name:</b>	210914.1				
<b>Lab Number:</b>	2719806.1				
Multiresidue Analysis 2 - Honey Samples					
<b>Analytes Detected:</b>	None				

Please refer to the detection limits table for the list of analytes screened and their detection limits.

## Summary of Methods

The following table(s) gives a brief description of the methods used to conduct the analyses for this job. The detection limits given below are those attainable in a relatively simple matrix. Detection limits may be higher for individual samples should insufficient sample be available, or if the matrix requires that dilutions be performed during analysis. A detection limit range indicates the lowest and highest detection limits in the associated suite of analytes. A full listing of compounds and detection limits are available from the laboratory upon request. Unless otherwise indicated, analyses were performed at Hill Laboratories, 28 Duke Street, Frankton, Hamilton 3204.

### Sample Type: Honey

Test	Method Description	Default Detection Limit	Sample No
Multiresidue Analysis 2 - Honey Samples	Solvent extraction, SPE cleanup, dilution. Analysis by LC-MS/MS. In-house (using a Citrate buffered QuEChERS extraction).	0.010 - 0.3 mg/kg	1

These samples were collected by yourselves (or your agent) and analysed as received at the laboratory.

Testing was completed on 06-Oct-2021. For completion dates of individual analyses please contact the laboratory.

Samples are held at the laboratory after reporting for a length of time based on the stability of the samples and analytes being tested (considering any preservation used), and the storage space available. Once the storage period is completed, the samples are discarded unless otherwise agreed with the customer. Extended storage times may incur additional charges.

This certificate of analysis must not be reproduced, except in full, without the written consent of the signatory.
